

# MAIN CAMPGROUND STATUS

Last Updated: January 21, 2012

The Main Campground at Lake Guntersville State Park currently has ninety campsites open and available for rent. Fifty-five of those sites are full hookup sites and the remaining thirty-five have water and electric hookups. There are also two rental campers and a limited number of primitive camping sites available. The improved campsites that are open are located in A, B, D, and H Sections. A Bathhouse and H Bathhouse are the only two bathhouses currently open.

Park maintenance staff is currently working to repair and upgrade the electrical hookups and repair the water faucets in F Section. Once these repairs and upgrades have been completed the sixty-four full hookup sites in F Section will be ready for rent. At that point these sites will have 50 AMP electrical services in all new power pedestals, water, and sewer hookups.

Hopefully within the next month contractors will begin work on repairing C, E, F, and G Bathhouses and building a new bathhouse to replace D bathhouse which had to be demolished.

## CAMPSITES STATUS

A Section	Water and Electric Hookups	OPEN – 17 Sites Available
