State Park Special Opportunity Areas (SPSOAs) hunts are a management tool used to reduce the deer population within the park boundaries. The reduction of the deer herd is important in maintaining a balanced and healthy natural community for all flora and fauna. This new SPSOA public hunting opportunity has been created as a partnership between the Wildlife and Freshwater Fisheries and the Alabama State Parks divisions of the ADCNR. Hunters will be allowed to take up to three deer per day, only one of which may be an antlered buck. All deer must be accounted for and data submitted.

Deer hunters are required to record data of harvest date, sex, lactation presence, weight, and antler measurements on provided Observation/Harvest report forms at a SPSOA kiosk. Deer hunters are also required to extract the jawbone and leave it at SPSOA kiosk.

Hunters are required to email pictures of their harvest to the State Park Natural Resource Section.
