

PART OF DESOTO STATE PARK'S
34TH ANNUAL WILDFLOWER SATURDAY

NATURE'S HARMONY:

RELATIONSHIPS BETWEEN PLANTS & INSECTS

**MAY 1, 2026 ~ 6:00 PM DESOTO STATE PARK, FORT PAYNE, ALABAMA
CCC PAVILION, PICNIC AREA**

BRITTNEY M. HUGHES, DESOTO STATE PARK NATURALIST

For millions of years, plants and insects have been teaming up in remarkable ways!

Insects pollinate flowers, disperse seeds, recycle nutrients, and even defend plants from other pests. In return, plants provide nectar, foliage, shelter, and safe places to reproduce. It's a partnership built on mutual benefit—and it keeps our ecosystems running.

Join DeSoto State Park's Naturalist Brittney M. Hughes to explore the fascinating partnership between plants and insects—and discover how these small creatures make a lasting impact on the natural world.

FREE AND OPEN TO EVERYONE! FOR ALL AGES. NO RSVP NEEDED
